

da Vinci... Changing the **Experience of Surgery**

Over 1,250 Masterpieces and Counting

To better serve our patients and provide the most gentle treatment possible, we're leading the way in minimally invasive robotic surgery. Lakeland Health is the first of our size nationally to have three surgical robots.

This state-of-the-art technology allows patients to receive a whole new level of safer care. We are also the first in our region—including northern Indiana and Chicago—with two new da Vinci® Xi™ systems.

If you need surgery, talk to your doctor about the da Vinci and learn more about your options online.

See the robot in action, watch our latest commercial at:
