NEW TESTING ALGORITHM THYROID FUNCTION CASCADE

Available **April 1, 2021** Spectrum Health Lakeland Laboratory will update the Thyroid Function Cascade test. This test utilizes a cascaded testing procedure to efficiently evaluate and monitor functional thyroid status.

When TSH is normal, no additional testing will be necessary. However, when the TSH result is abnormal, appropriate follow-up tests will automatically be performed:

- If TSH is abnormal, free thyroxine (FT4) is performed
- If TSH is increased (>4.2 mIU/L), Anti-thyroid Peroxidase (TPOA) is performed
- If TSH is decreased (<0.10 mIU/L) and FT4 is normal, T3 Total is performed

ORDERING INFORMATION

Thyroid Function Cascade	TSH	FT4 (Free T4)	T3TOT (T3 Total)	Thyroid Peroxidase Antibody (TPOA)
EPIC Code: LAB2458 LIS Code: TFC	EPIC Code: LAB129 Price: \$100.71 CPT: 84443	EPIC Code: LAB127 Price: \$54.08 CPT: 84439	EPIC Code: LAB136 Price: \$78.63 CPT: 84480	EPIC Code: LAB858 Price: \$76.08 CPT: 86376
